We offer two (2) types of Slow Rust Finish:

1. Slow Rust Bluing.
2. Slow Rust Browning.

It may take a little longer and cost a lot more for rust bluing/browning but the results are superb. A must do for fine old doubles with soft soldered barrels. And it will blue or brown receivers made from cast and high nickel steel that turns red or purple in hot blue. Plus hot bluing will attack the soft solder and you don't want that to happen!
